Our Promise: People make the difference

FluiDyne Fluid Power sources from some of the world's newest progressive and technically advanced manufacturers. We are able to consistently produce high quality remanufactured Vickers, Racine, Denison, Oil Gear, Char-Lynn, and Rexroth pumps, motors, and valves. We also carry a complete line of New FluiDyne products to replace Vickers, Racine, Char-Lynn and Rexroth units in OEM and user applications. These products are interchangeable in fit, form and function and are backed by over thirty years of hydraulic application, service and manufacturing experience.

FluiDyne is one of the very few hydraulic remanufacturing facilities in the world with ISO 9001 certification. We approach your technical problems, shipment demands and cost challenges in the simplest way possible. We don't stand on formality but work within our entire system to get you what you need when you need it. We consider ourselves

your inside technical support group and our people will go out of their way to meet your needs.

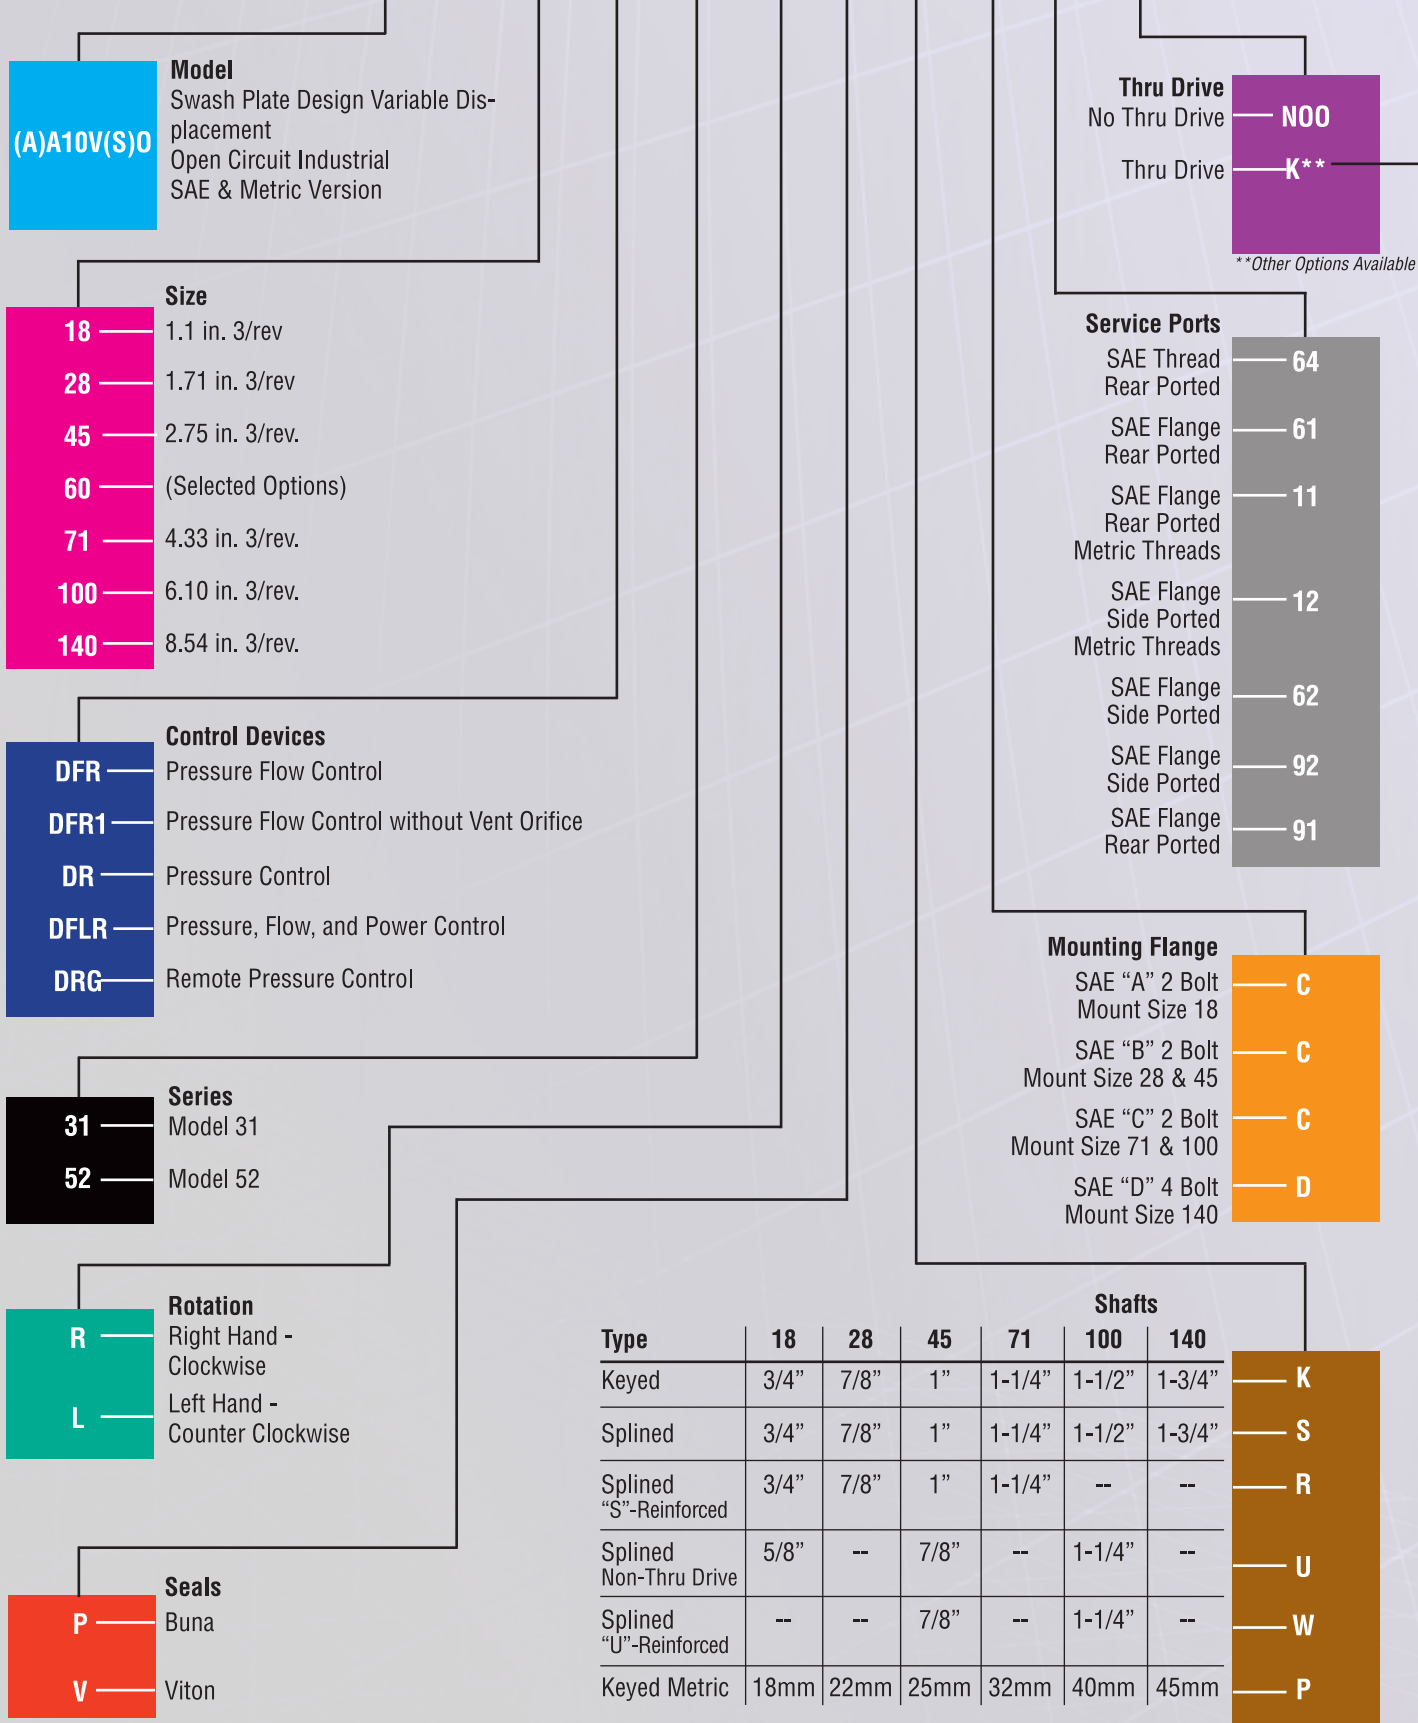

We maintain a massive inventory with a machining, finishing, assembly, and quality control operation in Fraser, MI. Our units and parts inventory allow us to ship a wide range of standard and modified products "same day". Prior to shipment, products undergo a complete documented pressure and flow performance test. These test results are printed on the bottom of your packing list and all products are given a 18 month warranty. One of the reasons customers buy from Western FluiDyne is our consistent high quality (one of the lowest return rates in the industry) and because we provide:

- **New FluiDyne and Remanufactured Products**
- **Outstanding Customer Service**
- **Custom Proprietary software allows immediate & accurate technical support, quoting, order entry & bill of material information**
- **18 month warranty**
- **Standard & Modified Products**
- **Extensive Michigan Inventory**
- **Twelve test stands that allow for quick 100% testing of all units shipped**
- **ISO Certified**
- **End Customer Protection**
- **Performance you have come to expect**
- **Blind Drop Shipments**

OUR PEOPLE MAKE THE DIFFERENCE

Precision Built and Totally Interchangeable

Variable displacement axial piston pumps are designed for open loop hydraulic systems. Flow is proportional to the drive speed by adjusting the position of the swash plate, it is possible to smoothly vary the flow.

Replacement Parts & Features

Features Include:

- Maximum Stop Adjustment
- Long Service Life
- Low Noise Level
- Wide Range of Controls
- SAE Metric Mounting Flange and Shafts
- Two Case Drain Connections
- Continuous Operation Pressure
4000 PSI (280 Bar)

Parts List:

- Rotating Groups
- Shafts
- Seal Kits
- Lens Plates
- Bearing Kits
- Cradles

We carry a complete line of remanufactured Rexroth A10V pumps. These units provide an alternative to expensive redesign projects, they are tested to meet OEM specifications (providing a long service life) and are ready for immediate shipment.
